## Decide With Confidence

### **Apoti** Fluorescence Immunoassay System

- 
**Powered by Europium-based Technology**  
 Europium is at the core of Time-resolved Immunofluorescence
- 
**Single Test Mode as well as Batch Test Mode**  
 Easy operations depending on requirements to increase efficiency
- 
**Comprehensive Range of Test Menu**  
 Multiple Test parameters in the area of Endocrinology, Cardiology, Inflammation, Nephrology etc.

### Technical Specifications

Principle:	Fluorescence Immunoassay
Test Format:	Cassette
Measurement:	Quantitative/Qualitative
Read Time:	<10 Seconds
Test Time:	Ref:Analytes
Specimen:	Urine/Plasma/Serum/Whole Blood/Swab
Display:	7" LCD touch screen
Power Source:	DC 12V
Dimensions(L/W/H):	280×240×130 mm
Weight:	<2.5Kg
OS:	Linux-based, windows – compatible Program
Storage Conditions:	-10°C ~ 40 °C
Operating Conditions:	4°C ~ 30 °C
Printer:	Built-in thermal printer
Connectivity:	USB 4 ports, LAN port, RS232 COM port (WLAN and GPRS are optional functions)
Compatibility:	LIS, HIS
Analytes:	Inflammation markers/Cardiac markers/Others.....

### Advantages:

- \* High accuracy powered by Europium based technology.
- \* Plug and play Simple Operation supported by ID cards eliminating the need for calibration each time.
- \* Ideal for Emergency situations with lightweight and easy operation.
- \* Quantitative Test Results – Critical for emergency therapeutic decisions.
- \* Reading time less than 10 seconds – Time-saving.
- \* Eliminates the need for constant clearing of cache with a storage capacity of up to 50000 test results.
- \* Built-in thermal printer, printing test reports instantly.
- \* Option of connecting to Laboratory information system or standalone computer.

# Single Test Mode as well as Batch Test Mode

Single Test

Quick Test

Dispense Sample

Insert after Incubation

Press "Quick Test"  
or Test Button

Get Result

Standard Test

- Walk Away System: Just add the sample to the test unit and insert test unit in the analyzer and do whatever you want during the incubation period. Results would be available at the end of incubation period with automatic reading.
- Allows the skilled technicians to do other tasks during the waiting period

Dispense Sample

Insert Immediately

Press "Standard Test"  
or Test Button

Get Result

Batch Test

- Multiple tests can be done at one time during the incubation period.
- Testing according to the alarm reminder.
- Saves time, when number of samples are high.

Press "Add Sample" to add the IDs of all samples to be tested.

Dispense the 1st sample and Press "START INCUBATION". Repeat the same operation for the rest tests.

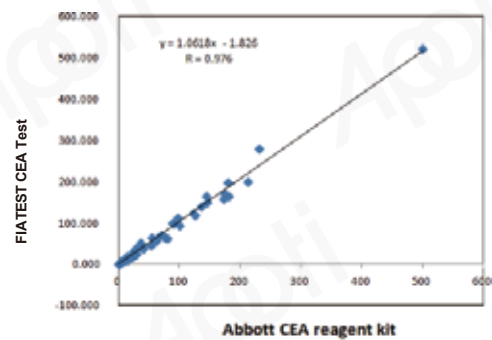

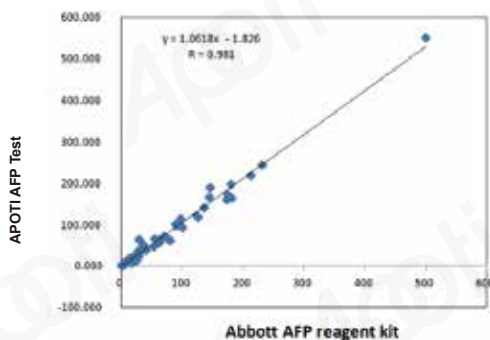

Insert the 1st test and Press "START TEST" as the 1st alarm starts to ring. Repeat the same operation for the rest tests.
